what is viewport in computer graphics?

A viewport is a polygon viewing region in computer graphics.

In computer graphics theory, there are two region-like notions of relevance when rendering some objects to an image. In textbook terminology, the world coordinate window is the area of interest (meaning what the user wants to visualize) in some application-specific coordinates, e.g. miles, centimeters etc.

The word window as used here should not be confused with the GUI window, i.e. the
